

Priaulx Library

Conditions referring to the use of Entries in Church Registers

The Priaulx Library and its users were granted access to the local Church Records on the understanding that this was for **personal use only**. An undertaking was given that copying would be restricted to individual entries referring to a specific family or families.

When printouts are requested, it is inevitable that other entries are shown, but information from these entries is intended for use by the recipient only. Whilst no objection has been raised to individuals disseminating this material in the form of family trees etc., the transmission of lists by such means as the internet is regarded as an abuse of the undertaking given.

The Library has already been embarrassed by persons failing to respect the conditions outlined above and is afraid that the continuance of this practice could lead to the permission to access the records being revoked.

We realise that this information may not have been generally known, but would appreciate everybody's co-operation. Any further specific questions about the use to which these records may be put should be addressed to the Chief Librarian.

Thank you,

Chief Librarian.
